NANUT LERTMAHAKIAT

Clinical Systems & Integration Platform Lead

Bangkok, Thailand | (+66) 92-882-8922 | nanut.lertmahakiat@protonmail.com | portfolio-nanutlmhk.vercel.app

PROFESSIONAL SUMMARY

Healthcare technology leader with 18+ years in software and integration, 8+ in Thai hospitals. I design, run and improve the platforms connecting bedside devices, clinical systems and the HIS, and I stay accountable for them after go-live.

CAREER HIGHLIGHTS

- Accountable for clinical systems across 60+ operating theatres and 120,000+ operating theatre cases.
- Built and run middleware that connects fragmented clinical systems and devices into the hospital platform.
- Led legacy clinical data migrations.

WHAT I BRING TO THIS ROLE

Area	Evidence
Operations and availability	24/7 OT systems: recovery paths, health checks, stability hardening
System integration	HL7 v2 with HIS, LIS, Blood Bank; drug orders; multi-vendor devices; FHIR and PACS in reference builds
Data management	Archive migrations, hash-verified records, retention, verified backup and restore
Security	Role-based access, audit trails, tenant isolation, de-identification
Incident and problem management	Root-caused long-running device data loss and fixed it, not just restarted it
Projects and change	Transitions, UAT, acceptance gates, handover guides, physician committee reviews
Team leadership	Technical Project Leader; led multidisciplinary hospital and vendor teams

PROFESSIONAL EXPERIENCE

Independent Healthcare Systems Consultant

Product, Integration & Platform Lead — June 2025 – Present

Clients include BDMS, ESM, Meditop, Siam SCI, Siam International Medical Equipment, CV Lab Thailand and Porjai.

- Design and build products and integrations across most of the hospital: patient access, OPD, operating theatre and ICU, laboratory and pathology AI, radiology and PACS, pharmacy, billing, HR and ERP.
- Deliver integrations and data migrations into live hospital systems, from requirements to acceptance and support.
- Fix recurring failures at the root, not by restarting them.
- Review vendor proposals and write the operating documents hospitals run on.

Dräger Medical (Thailand) Ltd.

Clinical IT Specialist | Medical Device Integration Expert | Technical Project Leader — 2017 – 2025

- Technical Project Leader for anesthesia information system implementations across major Thai hospitals, from planning to go-live and support.
- Led hospital IT, biomedical engineers, clinicians and vendors through integration, testing and go-live.
- Owned HL7 interfaces (ADT, DFT, observation) and resolved live incidents in operating theatre environments.

TTCL Public Company Limited

IT Engineer | Software Developer | Project Implementation Specialist — 2007 – 2017

- Built and delivered software for industrial, power and chemical-plant operations in mission-critical environments.

PLATFORM PORTFOLIO

Platform	Purpose	Status
OT charting + device middleware	Anesthesia record with multi-vendor devices (GE, Dräger, Philips, B. Braun)	Production, hospital OTs
Drug order integration	Dialysis system to HIS	Delivered
Legacy Migration Project	Migrate and integrate legacy system records into a new PostgreSQL archive	Deployment in progress
Radiology AI Support	DICOM image analysis integrated with PACS	Pre-pilot
BDMS (confidential)	Hospital platform consulting; details under confidentiality agreement	Ongoing

TECHNICAL SKILLS

Area	Skills
Interoperability	HL7 v2, FHIR R4, DICOM/DICOMweb, REST, SOAP, Kafka
Data and security	SQL Server, PostgreSQL, SQLite; Keycloak/OIDC, row-level security, audit
Infrastructure	Windows Server, Ubuntu, Docker, Kubernetes manifests, hospital networks
Development	TypeScript, Node.js, React, Electron, Python

EDUCATION AND LANGUAGES

Bachelor of Science in Information Technology — King Mongkut's Institute of Technology Ladkrabang (KMITL)

Languages: Thai, English
